

# Dismantling Tool No. 25

WEICON has been developing and producing various types of cable stripper since 1967. These premium quality tools are TÜV-tested, carry the GS seal for verified safety, and were developed taking occupational safety and user-friendliness aspects into account. The WEICON range includes cable strippers, cable dismantling tools, wire strippers and various multi-function tools for professional users.

## Description

WEICON cable strippers allow all common round cables to be stripped accurately, quickly and safely. The cable stripper product family includes various types which have different additional functions, thus meeting the individual needs of the users.

The Dismantling Tool No. 25 was developed for stripping cables with sheath thickness of up to 5 mm. The cutting blade can be used for round and length cuttings. For the round cut a minimum cable diameter of 25 mm is necessary.

The cutting of the outside insulation will be effected by a slight lever movement and simultaneous pressing of the tooth system to the insulation. This tool consists of a shock-resistant polyamide-body with an integrated, double-sided cutting blade and a connected, movable gear wheel. It enables in a safe way to realise length and round cuttings on the cable isolation. The isolation can be cut either at the end or at an intermediate part of the cable. The cutting-depth can be adjusted step by step from 0 to 5 mm, by turning the screw head (steps of 0,1 mm). The blade form enables the dismantling of the cable sheath including possible aluminium shieldings, until a total thickness of 5 mm. The layers below will not be damaged. The cutting process can be realised even at very low temperatures (-10°C) without difficulties. The tool-blade has a hardness of min. 48 HRC and is easily exchangeable.

## Technical data

Cable type:	cable with sheathing thickness (of outer isolation) of up to 5 mm
Field of use:	length and round cut is possible from min. Ø 25 mm
Inner blade:	adjustable step by step per 0,1 mm, easily exchangeable
Additional benefits:	including storage box
Approval/certificate:	EN 10020
Material:	shock resistant polyamide, steel, brass
Length:	210 mm
Weight:	220 g
Accessories:	spare blade on request

## Note

Working with WEICON Stripping tools is only permitted with potential free wires and conductions.

Ø > 25 mm
